SKILLS:

JavaScript, Node.js, Express, React.js, Redux, Ruby, SQL, HTML, Bootstrap, CSS, Heroku, Firebase, MongoDB, Mongoose, Microsoft Office, Adobe Photoshop

PORTFOLIO:

ExpressClothing (Node.js, MongoDB, Bootstrap, jQuery, Heroku)

[Demo](#) | [GitHub](#)

Ecommerce clothing store completed from scratch where you can register, look for items, choose, modify cart and etc.

- Node.js and Express is used for backend services connected to MongoDB database of collection of users, categories, items and session storage through MongoDB Atlas;
- Mongoose modeling schema along with Joi library is used for validation and CRUD function to the database;
- Ajax is used for fetching Json responses from database and updating DOM in real time, while filling up the registration form and logging in or adding item to the cart and etc.
- Bcrypt is enforcing security of passwords and Oauth through Passport library is used for Facebook login;
- Express Sessions is used for cart modeling and Jwt token - for authorization and authentication of a user.

To Do List (React.js, Local Storage Session, Firebase)

[Demo](#) | [GitHub](#)

To do list which you can fill in and come back later to update

- Used React.js to create full CRUD functionality, enabling users to easily write and edit to do items;
- Data is kept and updated in Local Storage Session which keeps items to the list even after closing the browser and is retrieved on each visit and reload;

Tic-Tac-Toe (Vanilla JavaScript, Firebase)

[Demo](#) | [GitHub](#)

Game of Tic Tac Toe with unbeatable Ai

- Vanilla JavaScript is used to implement logic of the game for a realtime experience against computer player;
- Built in Minimax algorithm makes computer player unbeatable;
